Research Projects and Groups: an Example

Transatlantic Literatures

<http://rcc.harvard.edu/transatlantic-literatures>

- Co-chairs: Isabel Durán (Universidad Complutense de Madrid), Claudia Alonso (Ayudante Doctora at Valencia University) Bronia Greskovicova (PhD Candidate, Universidad Autónoma de Madrid), Carlos Varón González (PhD Candidate in Romance Languages and Literatures at Harvard University), David Yagüe (TA in Romance Languages and Literatures, Harvard University), Ana Yáñez (Lecturer in Spanish at MIT Global Studies and Languages).
- This Study Group arises from the International Conference that took place in RCC, in April 2014, and brings together the interest of Humanities Scholars working on both sides of the Atlantic.
- **The aim of this project** is to revise, revisit and question the meaning and cultural impact of such spaces and the physical, psychological and aesthetic distance between them. Through the lens of comparative literature, this program attempts to bring together scholars working on American, Latin American, South American and/or European (Spanish, British, etc.) literary studies so as to delve into the complexities of spatial constructions and depictions within the written piece.
