AFE AIRFILTER EUROPE, GERMANY

Student support for international sales

Italy · Spain · Greece · Hungary · Serbia · Croatia

Customer outreach and translation

Are you interested in technology and enjoy communicating with people? Support our sales team in your home country or country of study and gain practical experience in international B2B business.

About us

AFE Airfilter Europe is a company based in Germany specialising in components for compressed air and process gas treatment. Our product range includes filters, filter elements and compressed air dryers for customers in industry, distribution, and machinery and plant engineering.

Your responsibilities

- Research potential new customers and identify suitable contact persons.
- Make initial contact in the local language and assess interest in our products.
- Discuss your findings with our sales team in English or German and support follow-up communication.
- Translate product information, technical documentation and correspondence as required.
- Help prepare and attend local customer meetings and provide language support as required.

Your profile

- You are a student living in one of the countries listed above.
- Excellent command of the local language and confident written and spoken English or German.
- A basic understanding of technology and an interest in industrial products.
- An independent, thorough approach to work and confidence in contacting companies.

Prior knowledge of compressed air treatment is not required. We will introduce you to our products and tasks.

Working arrangements and remuneration

The role is designed to fit around your studies. We will agree on the scope of work, working hours and remuneration individually, for example a fixed payment or payment based on time spent.

Application and contact

Please send us a brief application in English or German, including your CV, field of study, location, language skills and availability. Please also specify the country in which you would like to support us.

Your contact person:	Mrs Susanna Zeidler
Email address:	s.zeidler@airfilterengineering.de

AFE Airfilter Engineering Group
Your Global Partner in Compressed Air & Gas Treatment

Who We Are

The AFE Airfilter Engineering Group is a leading Asian manufacturer and solution provider in the field of compressed air and gas treatment. With decades of German engineering experience and a strong commitment to innovation, we design and produce high-performance filtration and drying systems in Malaysia and Germany that ensure reliability, efficiency, and energy savings across industrial applications worldwide.

Global Footprint

Headquartered in Malaysia with German management, the AFE Group operates through a network of strategic subsidiaries and partners in Malaysia, Singapore, and across the European market. This regional presence allows us to deliver consistent product quality, local technical support, and responsive customer service – ensuring our partners can rely on us wherever they operate.

Main Product Portfolio

- Compressed Air Filters & Elements – high-efficiency filtration solutions for particle and oil removal
- Adsorption and Refrigeration Dryers – ensuring optimal air quality and system protection
- Nitrogen Generators (N_2 Systems) – reliable on-site nitrogen supply for industrial processes
- Customized Solutions – tailored to specific environmental and operational requirements

Why Partner with AFE

- German Engineering Quality – designed and manufactured according to the highest international standards and all majors certifications.
- Proven Track Record – trusted by OEMs and distributors in more than 50 countries
- Agile Collaboration – flexible production and supply structures supporting regional growth
- Commitment to Long-Term Partnerships – focusing on shared success and sustainable value creation

The AFE Group is currently expanding its Asian distribution network, with a particular focus on South-East Asia, and is seeking reliable partners to strengthen our presence in the region.
